Education

University of Karachi — Karachi
Bachelor in Computer Science — *Aug. 2021 – Jan 2025*

Experience

Senior React Native Engineer — June 2025 – Present
Digital Gravity — *Karachi*

- Migrated legacy real estate mobile app to the latest React Native architecture.
- Integrated In-App Purchases and multiple payment methods.

React Native Engineer — Sep. 2023 – May. 2025
Koder360 — *Karachi*

- Built a digital marketplace for buying and selling mobile-related items with business and user profile management.
- Integrated social logins (Facebook & Google).
- Developed an app for testing device sensors and ensuring hardware compatibility.

Associate React Native Engineer — May. 2021 – Sep. 2023
Tech Verticks — *Karachi*

- Developed horse, veterinary, and farm management app.
- Built restaurant table & booking management system.
- Created a services marketplace app for local and remote vendors.
- Implemented in-app purchases, Stripe integration, real-time chat with sockets, and WebRTC-based audio/video calls.

Projects

Mobilez Market | *Typescript, React Native, Firebase, Google AdMob*

- Developed a cross-platform mobile application using React Native, integrating REST APIs, device sensor libraries, and Firebase to enable real-time chat and push notifications.

Pidj | *Javascript, React Native, Firebase, Sockets.io, Google Places*

- Built the Pidj text messaging app using React Native, Firebase, and WebSockets, enabling 2-way communication and Textcast features for real-time business and community messaging.

Fluospeak | *Typescript, React Native, Firebase*

- Developed a cross-platform English learning app using React Native, integrating real-time voice chat with native speakers, instant feedback, and personalized lessons to enhance fluency and pronunciation.

PhoneSheet | *Typescript, React Native, Firebase*

- Developed a cross-platform call management app using React Native, enabling users to track incoming and outgoing calls, save notes, and organize communication history efficiently for professional use.

Prox Vet | *Javascript, React Native, Firebase*

- Developed a React Native mobile platform for equine veterinarians, enabling digital medical records, two-way video consultations, appointment scheduling, and integrated invoicing and payment management.

Technical Skills

Languages: JavaScript, TypeScript, HTML/CSS, SQL (basic), Kotlin, Swift
Frameworks & Libraries: React Native, React, Redux, Firebase, Socket.io, WebRTC, WebSockets, Native Modules
Mobile Development Tools: Xcode, Android Studio, Gradle, CocoaPods
Payments & APIs: Stripe, In-App Purchases, REST APIs, Social Login (Google, Facebook)
Developer Tools: GitHub, Bitbucket, Postman, VS Code, Cursor
Ï **Testing & Debugging**: Jest, React Native Debugger, Flipper
